Ipitomi storms into The Sunday Times Tech Track 100

Ipitomi has been named as one of Britain's fastest-growing private technology companies in this year's Sunday Times Tech Track 100 league table, reaching the position of number 55. Ipitomi recently announced its financial results for the year ending 31st July 2008. From a period of 2004 to 2007, turnover increased from £3.3 million to £12.5 million.

About the league table

The Sunday Times Tech Track 100 is independently compiled by research company Fast Track and published in The Sunday Times newspaper. The title sponsor of the league table is Microsoft with co-sponsorship from Barclays Commercial and BDO Stoy Hayward.

League table criteria

Companies are ranked according to their Compound Annual Growth Rate (CAGR) in sales. Companies had to be registered in the UK as unquoted ultimate holding companies. The survey adopted the London Stock Exchange's techMARK definition of what constitutes a technology company. Companies primarily engaged in simply reselling or re-assembling were excluded.

Speaking about Ipitomi's recent accolade, Adrian Coppin, Managing Director, said: "It's a great achievement that Ipitomi's sustainable growth is recognised by The Sunday Times Tech Track. I am sure the company will continue its success in the years to come by providing high quality managed Information Communication Technology (ICT) services."

About Ipitomi

Ipitomi provides high quality Information Communications Technology solutions (including IP, mobile, ISDN, data, internet bandwidth, conferencing and hardware provision) for organisations ranging from SMEs to large multinationals as well as specialist solutions for property estates.

Established in 1998, Ipitomi offers a comprehensive range of products and services allowing the company to provide the right combination of services to best meet customer requirements. Ipitomi is also in an ideal position to deliver a complete, fully integrated and managed solution so that all of an organisation's technology and telecoms requirements are met by one provider.

The Ipitomi philosophy is to combine market-leading technologies to offer organisations more productive and flexible ways of working. After thoroughly analysing and appraising new technologies, Ipitomi offers the most reliable, cost-effective and leading edge solutions. This means organisations don't have to worry about the teething problems of new technology but can rather focus on their core business activities.
